PROJECTS

Mini-Docs: - <https://github.com/Ranpariya-Keshav/Mini-Docs>

Developed a modern React-based Docs App with a clean, layered document UI and interactive card-based layout, showcasing front-end design skills and component-driven development using Vite and Tailwind CSS.

Core Features – Interactive draggable document cards, Clean and minimal docs-style interface, Responsive layout for different screen sizes, File metadata display such as size and status, Upload/download action tags, Modern visual design with dark color palette, Smooth animations using Framer Motion

Chabot Using Gemini: - <https://github.com/Ranpariya-Keshav/Chatbot>

Built a full-stack AI Chabot web application using React, Express, Node.js, MongoDB, JWT authentication, Google Gemini 2.5 Flash API, and Razor pay payments.

Core Features - Full-stack AI Chabot platform with user authentication, Gemini-powered conversations, paid subscription tiers, persistent chat history, admin controls, and Razor pay
